🏢 Your Childcare Facility Security

KidCheck is a global check-in system that allows you to use a single account to check-in at any childcare facility that uses KidCheck.

By default you can check-in at any childcare facility that uses KidCheck, but you can alternatively specify only the childcare facilities you regularly use. In either case, your information is never available to any childcare facility until you complete check-in at that facility.

Facility Security:

☐ Allow check-in anywhere.

☑ Only allow check-in at selected facilities.

Childcare Provider	Location	Options
Add a new check-in facility by clicking the add button on the left.
